

2018 FINANCIAL PLAN PRESENTATION

RURAL MUNICIPALITY OF GIMLI

Welcome

Welcome to the 2018 Financial Plan Hearing.

We thank you for attending.

This presentation will give a general overview of the 2018 Financial Plan.

There will be an opportunity for questions following the presentation.

The Financial Plan

After a careful and extensive review Council makes the financial decisions for the Municipality. When making those decisions, their role as elected officials is to safeguard the taxpayer's money and make the best use of financial resources; while maintaining or improving service levels.

At the center of the municipal finance system is the budget. Through the budget, Council decides the municipality's priorities for the next 1 to 5 years by balancing the funds for each program or service.

The budget is the single most important policy decision council makes each year. Careful budget planning and control mean better services for the residents.

The budget of a municipality reflects its policies.

The 2018 Challenges

- ▶ The main challenges in 2018 continue to reflect Council's ongoing directive to make every effort to manage existing debt servicing and minimize taxation impacts by balancing the increased growth in service delivery to our assessment growth.
- ▶ Council continues to balance a large number of community requests for project funding in alignment with the delivery of expected and required Municipal services as well as the management of debt servicing and the funding of Reserves.
- ▶ Commitment to continue to find new ways to manage the delivery of municipal and community services in the most efficient and cost effective manner.
- ▶ To maintain the financial objective to fund Reserves from Municipal taxation
- ▶ To minimize the use of borrowing for Capital Purchases both current and long term with grant opportunities.
- ▶ To maintain the goals of our long range debt management and the establishment of new revenue sources for the Municipality.
- ▶ To always provide a balanced approach to managing the needs of Municipality while remaining mindful of the importance of being stewards of the environment.
- ▶ To prepare for the future growth of our community.

TAXATION

Every year Council meets to set the municipal budget for the coming year. After revenues such as grants from other governments and user fees are taken into account, the balance of the budget must come from property taxes which is referred to the General Mill Rate. The formula used to calculate taxes is:

$$\text{Portioned Assessment} \times \text{Mill Rates (both municipal \& school)} / 1000 = \text{Property Taxes}$$

2017 to 2018 Mill Rates

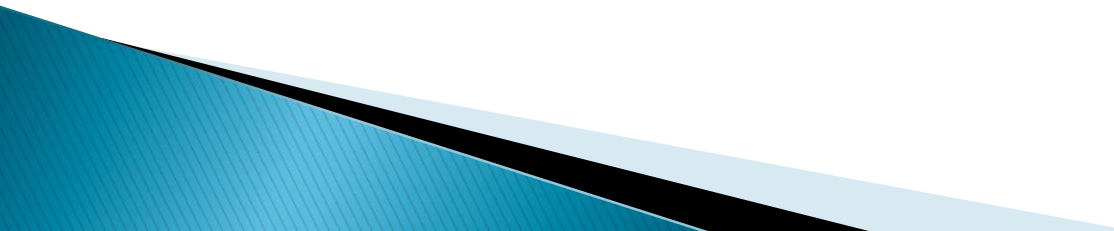

Evergreen School Division's mill rate has decreased from 10.500 to 9.770 a decrease of .730 of a mill

The Provincial Levy increased from 10.944 to 10.984 an increase of .040 of a mill

The Municipality's General Mill Rate has increased from 12.566 to 12.571 an increase of .005 of a mill

Where do Assessments Come From?

- ▶ Assessment Services is responsible for the assessment of all real and personal property in the province and outside the City of Winnipeg.
 - ▶ Properties in Manitoba are assessed every two years to ensure assessment values keep pace with changing real estate market values.
 - ▶ 2018 is a province wide reassessment year.
 - ▶ The 2018 Assessments are based on the 2016 market values.

MEETING THE 2018 CHALLENGE

- ▶ The 2018 Balanced Budget has attempted to manage taxation increases by effectively redistributing past budget allocations and providing more efficient use of operational funding, while funding reserves and managing our debt servicing requirements.
 - ▶ The commitment of Council remains in place to increase reserves and reduce the current dependency on debt to finance capital projects and purchases in the Municipality.
 - ▶ The Long Range Debt Management Program will be reflective of the need to utilize growth to recover a portion of the debt financing through Utility Rates, Capital Development Levies, Added Taxes, User Fees and a “Developer Pay” strategy.
 - ▶ The Goal is to Limit Borrowing for Infrastructure such as sewer, water and new roads.
- 

This concludes our the 2018 Financial Plan presentation.

Tonight's Presentation will appear on the RM of Gimli's website.
